Jasmine graduated with a Bachelor's of Science in Natural Science Biology from the University of Florida in 2019

Research Interests

Infectious disease with an emphasis on zoonotic diseases, as well as an interest in vaccine development.

Career Goals

After completion of the MHS program, I plan to attend physician assistant school. In my future I will represent vulnerable populations, like children and the underprivileged, to provide healthcare and promote high vaccination rates to lower the incidence of preventable disaease.

Jasmine Palmer

MASTER OF HEALTH SCIENCE IN ONE HEALTH

Why did you choose the University of Florida?

I chose UF because I was able to see its constant perseverance and motivation in its research and spreading knowledge, especially within the Environmental & Global Health Department. Moreover, the faculty and staff within UF pushed me to excel in my studies and angle me towards my goals.

What philosophy guides you in your education?

"Let me tell you the secret that has led me to my goal. My strength lies solely in my tenacity." Louis Pasteur

If you could solve one environmental and/or global health problem, what would it be?

If I could solve one global health problem, I would solve the problem of unsafe drinking water and the risk of pathogens within the water supply globally.

Research Experience:

I am currently working with SHEAR to investigate STI rates within the college population.
