

Xiaolong (Bruce) Li

PHD IN PUBLIC HEALTH, ONE
HEALTH CONCENTRATION

Why did you choose the University of Florida?

The reputation of the University of Florida as well as the opportunity to work with world-class professors brought me here.

If you could solve one environmental and/or global health problem, what would it be?

I would like to work on the food safety issues in developing countries to improve people's living standard.

Bachelor of Science degree in Biotechnology and a Master of Public Health degree in China.

Languages: English & Chinese

Research Experience

- Research assistant at the National Institute of Viral Disease Control and Prevention
- China CDC to study the epidemiology of arbovirus-related diseases and the influence of climatic and environmental factors on transmission dynamics of these diseases in China from 2014 to 2018.

Research Interests:

- spatial epidemiology
- geo spatial risk assessment
- spatial regression modeling of foodborne diseases.
