

Daniel Eduardo Acosta Gandur

PHD IN ONE HEALTH

Why did you choose the University of Florida?

I came to UF initially for my master's degree in Sustainable Development, UF as an institution has surpassed my expectations, and I am happy to continue being a part of the gator nation.

What philosophy guides you in your education?

Hard work pays off.

What is your research experience?

UF Livestock Systems Innovation Lab, USAID: Supply Chain Researcher. Using quantitative skills, aids in design, implementation, and analysis of practical and research interventions aiming to optimize Peste des Petits Ruminants vaccine delivery in Karamoja, Uganda.

If you could solve one environmental and/or global health problem, what would it be?

Food insecurity, as malnutrition has devastating effects on health outcomes. No one should be hungry.

Educational Background

Certificates

Public Health

African Studies

Tropical Conservation and Development

Masters

Sustainable Development Practice

Research Interests:

- Vaccines
- Supply
- Value
- Distribution chains
- Nutrition
- Global Health
- One Health

Career Goals

I want to continue to do research, and in the future lead big research projects that aim to improve
